BUMPER LUBRICANTS

We are one of the leading Manufacturer and Exporter of Industrial Lubricants, **Mivan shuttering oil, shuttering grease** and deals in all kind of Calcium and Lithium Grease.

We are one of the principal formulators and suppliers of a range of accurately formulated industrial lubricants, hydro base shuttering oil, oil base shuttering oil etc., that find application across **construction and hydraulic industries.**

Our stringent quality test for our wide range of emulsifiers ensures the fine chemicals and oil meet international standards for accuracy, efficiency and quality. Quality tests are conducted through sophisticated machinery to ascertain excellence of formulation.

Under the able leadership of our mentor, **Mr. Padam Jain (Managing Director),** we have developed our company as one of the reputed names in preparing fine quality industrial oil, shuttering oil and grease. His exceptional skills and product know-how enables us to handle large production volumes in specific product category. Under his phenomenal direction and ambit of 10 years of experience, we have embarked on an expansion plan which will help double the annual capacity of our flagship products.

INFRASTRUCTURE

Our company takes pride in possessing a world class infrastructure that is instrumental for setting new benchmarks in meeting the small as well as bulk requirements of our clients and to deliver our range within the stipulated time frame. The total plot area of manufacturing plant is 1000 sq. ft and installed capacity of manufacturing plant is 500, with a large warehousing facility to store sufficient volumes of products such as that are manufactured in-house. We also duly maintain the high standards of quality in our warehouse and regularly monitor the quality of our outsourced products.

The latest machines help us to supply and export voluminous consignments in the stipulated time reflecting state-of-the-art technology. The equipment that helps us to produce a range of industrial oil and shuttering oil and grease are

- Reactors for producing grease.
- Reactors for oil blending.
- Reactors for producing Brake Fluids.
- Packaging and Sealing Machine.

Our manufacturing unit is properly constructed to facilitate easy cleaning, proper maintenance of machines and to carry out chemical processing smoothly. Since our range of products are highly inflammable safe operational features and proper ventilation factor is also considered while designing the unit which ensures prevention of processing mix-up and cross contamination.

Our infrastructure also comprises of storage house for raw material that is instrumental in storing our finished range that is packaged in plastic containers.

QUALITY ASSURANCE

Quality stands high on our priority list and it is ascertained that at our organization quality is never sacrificed for the sake of quantity. To achieve our aim of producing precisely formulated range of industrial oil we have designed a strong project management system that incorporates high standards of accuracy, that are at par with the prevailing quality standards in the industry for formulating our range. Our quality auditing department devises and implements latest methodologies right from choosing high grade raw materials like oil and chemical formulating our range, regular quality checks are conducted and periodically the performance and efficiency of the range as a whole is tested.

The various quality parameters that our range is tested upon are:

- Preside Ph value
- Appropriate composition
- Consistency
- Non toxic
- Free from any reactions

BUMPER LUBRICANTS

Guided by our Research & Development department, our quality inspectors work hard in order to assure that our products meet and even go beyond the expectations of our clients.

Moreover, special care is taken that our personnel are awarded with periodical training to keep them updated with the latest market trends.
